

Protect Your Valuable AR Lenses with the LZF II Automatic Deblocking System

- The Improved LZFII edging deblocking system will handle all-sizes of lenses as well as those with brittle coatings. Fast and ergonomically correct, the LZFII deblocks finished lenses without the flexing and bending that normally occurs with hand deblocking.

Easy to use! Compact * Craze-Free * LZF II

As easy to operate as it is space saving (only 8" x 15"), the LZF II accommodates whole-eye, half-eyes, and oval blocks. Replacing hand twisting with pneumatic power, the LZF II makes the edging deblocking process easy and efficient.

Distinct Advantages

- Puts a stop to crazed-lens breakage
- Eliminates wrist action to prevent carpel tunnel
- Improves work flow by eliminating the need to sort work
- Increases production- 200 pairs/hour
